CAREER OBJECTIVE

Full Stack Developer with expertise in React.js, Node.js, and modern databases (MongoDB/PostgreSQL). Skilled in end-to-end development, from UI/UX design to backend architecture, focusing on scalability, security, and performance. Seeking to join a team to build innovative full-stack solutions and grow as an engineer.

TECHNICAL & SOFT SKILLS

Frontend : React.js, Next.js, Redux Toolkit, React Query, Tailwind CSS, Material UI, HTML5, CSS3, Vite.

Backend : Node.js, Express.js, REST APIs, JWT Authentication, Firebase Admin.

Database : MongoDB (Mongoose), PostgreSQL (Sequelize), Firebase Firestore.

DevOps/Tools : Git/GitHub, Postman, Vercel, Netlify, Docker (Basic), AWS (Basic).

Soft Skills: Full-stack problem-solving, System design, Agile workflows, Collaboration, Mentoring.

PROJECT

PawMart - (Nov 2025 – Nov 2025)

[GitHub Client](#) | [GitHub Backend](#) | [Live Demo](#)

Designed and developed a full-stack MERN application for managing pet adoption listings and orders. The frontend, built with React.js and Tailwind CSS, delivers a responsive and intuitive user interface with dynamic routing and Firebase Authentication for secure login. The backend, implemented with Node.js, Express.js, and MongoDB, includes JWT-protected routes and robust CRUD APIs for listings, orders, and user management. Key features include user dashboards, PDF exports, and optimized performance for fast and reliable interactions. This project demonstrates the ability to create scalable, secure, and full-featured applications from concept to deployment..

My Daily Blog (Nov 2025 – Dec 2025)

[GitHub Client](#) | [GitHub Backend](#) | [Live Demo](#)

Developed a modern, full-stack blogging platform combining Next.js frontend with Express.js backend. Frontend incorporates NextAuth authentication, search and filtering functionality, and fully responsive design for an enhanced user experience. The backend supports role-based access control (Admin/User), CRUD APIs for posts, and efficient data management with MongoDB and Mongoose. Optimized API calls ensure fast performance, while seamless frontend-backend integration allows smooth interactions. This project showcases end-to-end development skills, secure authentication, and the ability to build scalable, production-ready applications.
