

CAREER OBJECTIVE

Full Stack Developer with expertise in React.js, Node.js, and modern databases (MongoDB/PostgreSQL). Skilled in end-to-end development, from UI/UX design to backend architecture, focusing on scalability, security, and performance. Seeking to join a team to build innovative full-stack solutions and grow as an engineer.

TECHNICAL & SOFT SKILLS

Frontend : React.js, Next.js, Redux Toolkit, React Query, Tailwind CSS, Material UI, HTML5, CSS3, Vite.

Backend : Node.js, Express.js, REST APIs, JWT Authentication, Firebase Admin.

Database : MongoDB (Mongoose), PostgreSQL (Sequelize), Firebase Firestore.

DevOps/Tools : Git/GitHub, Postman, Vercel, Netlify, Docker (Basic), AWS (Basic).

Soft Skills: Full-stack problem-solving, System design, Agile workflows, Collaboration, Mentoring.

PROJECT

School Management System- (20/02/26 – 24/03/2026)

[GitHub Repository](#) | [Live Demo](#)

A comprehensive role-based platform that digitizes academic and administrative processes for schools, serving four user roles with dedicated dashboards, real-time updates, and integrated online payments using Next.js.

- Engineered role-based authentication using NextAuth.js and custom middleware, securing 20+ API routes and pages.
- Built fee management module with SSLCommerz integration, enabling online payments, partial payments, receipt generation, and automated transaction verification (IPN).
- Designed academic modules (attendance, grades, assignments) with data visualisation using Recharts; improved grade entry efficiency by 40%.
- Implemented Cloudinary file upload for profile images and assignment submissions, with upload progress indicators.
- Developed responsive UI with TailwindCSS and DaisyUI, ensuring cross-device usability; used Framer Motion for smooth animations.

eTuitionBd –Tuition Management System(07/12/25 – 12/01/26)

[GitHub Client](#) | [GitHub Backend](#) | [Live Demo](#)

A complete role-based platform connecting Students, Tutors, and Admins with tuition matching, secure payments, and real-time analytics using React, Express, MongoDB, Firebase, Stripe, TailwindCSS.

- Full-stack architecture – React (Redux Toolkit) frontend, Express REST API, MongoDB, Firebase Auth, JWT, Stripe payments.
- Role-based workflows – students post tuition, tutors apply, student approves via Stripe; admin moderation & user management.
- Advanced features – search/filter/pagination, payment webhooks, transaction history, earnings reports.
- Admin analytics – Recharts dashboards for user activity, tuition moderation, financial insights.
- Responsive UI – TailwindCSS v4, DaisyUI, Framer Motion animations.

PawMart - (10/11/2025 – 04/01/2026)

[GitHub Client](#) | [GitHub Backend](#) | [Live Demo](#)

Built a full-stack MERN pet adoption platform with React/Tailwind CSS frontend and Node.js/Express backend. Implemented Firebase Auth, JWT-protected CRUD APIs, user dashboards, PDF exports, and optimized performance for a scalable, secure solution.

Education & Certification

Complete Web Development Course With Programming Hero
